

**Psychologist services are expanding in the Manitoba health system through significant government investment!** We are recruiting for newly funded full-time permanent doctoral positions, based primarily in Winnipeg hospitals and health centres, with opportunity for rural adult and lifespan practice as well.

Clinical Health Psychology (CHP) is both a provincially-led clinical service in Shared Health, responsible for psychological services throughout the Manitoba health system, and an academic department in the Max Rady College of Medicine, University of Manitoba. Our clinical psychologists are medical staff who work in interprofessional team-based care environments, enjoying well-established collaborations with physician, nursing, and allied health colleagues to provide innovative and effective care. Many also hold clinical faculty appointments. CHP psychologists connect regularly with each other, whether based in Winnipeg or in rural or northern health regions, and have a respectful and caring community of professional practice.

**Opportunities include mental health and medical areas across the lifespan.** We offer competitive salary, comprehensive benefits, relocation support, clinical supervision until licensed for independent practice, ongoing professional development, professional license reimbursement; and opportunity for supervision of psychology residents and clinical research through integrated clinical/academic roles.

**Current residents/interns, beginning career and established psychologists are welcome to apply.**

**Let's talk! Contact us to learn more; send your CV and cover letter indicating your area(s) of interest.**

Dr. Lesley Graff Provincial Specialty Lead, Shared Health & Department Head, University of Manitoba
